

ROADMAP

How to identify and prioritise the most vulnerable - tracking services and distributions with beneficiaries.

Beneficiary Tags · ~ 20 MIN TO SET UP

THE REQUIREMENT — IN YOUR WORDS

We work with beneficiaries with varying vulnerabilities and need for support - some have medical needs, some are unaccompanied minors, others are new arrivals. We need a way to flag who needs support and make sure they are prioritised and overall that we provide fair access to aid.

1

Register your beneficiaries

Every person or household receiving support should be added as a beneficiary within Boxtribute so you can track your impact and reach.

Create your beneficiary tags first; this will allow you to select the appropriate tags from the dropdown options when registering beneficiaries.

1. Go to Beneficiaries → Add Beneficiary.

2. Enter relevant beneficiary data, including tags and comments. Utilize the comments section to add any relevant information that is specific to the beneficiary.

3. Then select 'Save and Close'.

2

Use tags to identify and prioritise the most vulnerable

Tags on beneficiary records work the same way as tags on boxes, allowing you to group and filter quickly. It is especially helpful to utilize tags to flag vulnerability categories.

Once tagged, you can filter your beneficiary list by vulnerability category before a distribution. This ensures that priority beneficiaries are served first.

Surname	Firstname	Gender	Age	Refugee / Case ID	Tokens	Tags
Total		500+ beneficiaries				
☐	Adams	Aaron	Male	52 yrs	8787	1000
☐	Adams	Eric	Male	49 yrs	3870	1000 structure floor
☐	Allen	Adam	Male	41 yrs	6807	736
☐	Allen	Mark	Male	63 yrs	4892	684
☐	Arroyo	Thomas	Male	79 yrs	6419	928 Elderly
☐	Atkinsoner	Daisy	Female	78 yrs	7422	806 Elderly FHH
☐	Baker	Gail	Female	55 yrs	3440	902 FHH
☐	Barnett	Virginia	Female	48 yrs	8801	961 Project Cycle 177
☐	Anderson	Stephanie	Female	2 yrs	6078	
☐	Andersoner	Meghan	Female	6 yrs	6078	

You are able to enter tags that are relevant to the programming and support that you are providing. The following are some suggestions we see widely used.

Vulnerability category

- “FHH”: Female head of household
- “CHH”: Child head of household
- “PLW”: Pregnant or lactating woman
- “UNMIN”: unaccompanied minor
- “Elderly”: Elderly Household or individual

Priority status

- “new arrival”
- “emergency case”
- “referred by partner X”

3

Add your list of services / distributions

You are able to add all programming sectors and support that your NGO provides. This will allow you to track beneficiary usage, follow-up if services are missed and also have the most up to date information for reporting.

You can use this functionality to track service attendance, not just distributions. For example: If you run a weekly MHPSS support group, register the MHPSS support group as a service in Boxtribute. You'll instantly see who attended week one but dropped off by week two — so your team can follow up before someone disengages.

Name	Description	Total Usage	▼	Unique Usage
☐ English course		0		0
☐ PLW - Appointment	Regular pre-natal checkup.	0		0
☐ Distribution	Winterization Kits - Distribution Oct 2026	0		0
☐ New Arrival Kit	Standard Kit for New Arrivals	0		0
☐ Protection referral	Referral to protection partner - DRC	0		0
☐ MHPSS	Access to MHPSS Session	0		0

1. Select 'Manage services'
2. Click 'Add service'
3. Add all services that your NGO offers.

4

Use filters to prepare for a distribution

Filter through your beneficiary details to determine who should be prioritised for support and ensure that aid access is fairly granted. Filter functions can include tagged vulnerabilities, date of last visit, services accessed etc.

Sort by last visit date to quickly spot beneficiaries who may have been missed in recent distributions.

☐ Clayer	Ashley	Female	602	Disability contain wait	Step upon.
☐ Cook	Melanie	Female	416	Disability floor	Organization Mrs eat.
☐ Morrow	Kenneth	Male		Disability	Grow hundred languag

Before a distribution event, filter your beneficiary list to:

- Identify who has not visited recently
- Find all households with a specific vulnerability tag
- Confirm who is due for their next collection

5

Record a distribution or service

Record each beneficiary who has received support from your organisation. This allows you to track goods received, services provided, and follow up if appointments are missed.

Boxtribute records the date, time, items given, and the staff member who processed it automatically. The software also has the ability to manage a Free Shop, where beneficiaries can choose their own items according to their needs. Boxtribute supports this with a dedicated functionality. The system allows you to arrange free access or to allocate vouchers to each eligible beneficiary, and each item selected is logged against the beneficiary record in real time. Please contact Boxtribute directly to discuss training on this.

Beneficiaries

- When beneficiaries come to collect goods or access a service:
- 1. Go to “Use Service” under the “Beneficiaries” section of the menu
 - 2. Under “Service”, select the name of the service or distribution being run
 - 3. Add the beneficiary or beneficiaries who are receiving the distribution or service;
 - 4. Select “Save”.

6

View distribution history

Easily see the full picture at every level - from an individual beneficiary's complete history of goods and services received, to programme-wide targets for donor reporting

Use 'Sales Report' → 'by People' (under Type) to see unique beneficiary counts, total visits, and distribution totals across your whole programme - useful for donor reporting!

- Every distribution is logged on the beneficiary's profile. You can see:
- What they received and when;
 - How many visits they have made; and
 - Their remaining voucher allowance for the current cycle

REFERENCE

Boxtribute lets you manage your beneficiaries within the platform, categorize by vulnerability or other status and capture who receives what, when, and how often. This keeps your distributions fair, accountable, and focused on the people who need support most.

Tip: Only staff with the appropriate role can view and edit beneficiary information. See the Preset roles - who can do what? reference if you need to check permissions.
